

FIBRELEX

Natural Wood Fibre Cant Strip

DESCRIPTION & USE

Cant Strips are used to provide a smooth transition from horizontal to vertical surfaces.

ADVANTAGES

- Ideal for transitions
- Prevents damage from occurring during construction and maintenance.
- Excellent substrate for most roof membranes
- Dimensionally stable

TECHNICAL DATA

Physical Properties and Characteristics

Width x Length x Height =
1219.2 mm x 101.6 mm x 38.1 mm
(48" x 4" x 1-1/2")

Test	ASTM	Cant Strip
Thermal Resistance 38 mm (1-1/2") thickness		RSI-0.7 (R-3.8)
Water Absorption	C 209	7%
Linear Expansion	C 209	0.5%
Resistance to Compression 10% Consolidation	C 165	103 kPa

APPROVALS & COMPLIANCES

- Factory Mutual Class 1
- CAN/ULC-S107
- ASTM C208, Type II
