

250/500 lb. capacity

EH-250/500

Patent pending on the electric hoist.

NEW Electric Hoist

- 250 lb. capacity material hoist (EH-250)
- 500 lb. capacity material hoist (EH-500)
- Environmentally-friendly electric hoist can be used indoors and outdoors
- Pendant control with 16 ft. cord allows operator to stand safe distance from load
- Both electro-magnetic and mechanical brakes
- Controlled descent of load
- Made with fewer parts for easy assembly (least number of parts of any Safety Hoist)
- Extremely portable thanks to steel frame on wheels
- Lightweight aluminum track sections
- Easy to set up
- No special tools required for assembly
- Sections bolt together
- One-person operation
- **28 ft. length standard, maximum 44 ft.**
- 4 ft. and 8 ft. extensions
- **Uses 110V AC power supply**
- **Self-lubricating platform wheels** (EH-500 only)
- Solid steel carriage wheels with ball bearings
- Self-storing multi-purpose carrier included
- Additional attachments available
- Easy to maintain or repair on-site

200 lb. capacity

CH-200

Rugged construction

- 200 lb. capacity material hoist
- Rugged all-steel construction
- Portable
- Lightweight aluminum track sections
- Easy to set up
- No special tools required for assembly
- Sections bolt together
- One-person operation
- **26.5 ft. length standard, maximum 42.5 ft.**
- 4 ft. and 8 ft. extensions
- **Briggs & Stratton gas engine (Honda optional)**
- 100% ball bearing winch
- Externally mounted bearings can be greased
- Adjustable motor base
- Solid steel carriage wheels with ball bearings
- Mechanism for locking carriage in place for transit
- Self-storing multi-purpose carrier included
- Additional attachments available
- Easy to maintain or repair on-site
- Self-energizing semi-metallic brake

300 lb. capacity

VH-300

400 lb. capacity

HD-400

Newly designed peak for strength

- 300 lb. capacity material hoist
- Made with fewer parts for easy assembly
- Rugged all-steel construction
- New peak for greater stability and strength
- Portable
- Lightweight aluminum track sections
- Easy to set up
- No special tools required for assembly
- Sections bolt together
- One-person operation
- **26.5 ft. length standard, maximum 42.5 ft.**
- 4 ft. and 8 ft. extensions
- **Briggs & Stratton gas engine (Honda optional)**
- 100% ball bearing winch
- Externally mounted bearings can be greased
- Adjustable motor base
- Solid steel carriage wheels with ball bearings
- Mechanism for locking carriage in place for transit
- Self-storing multi-purpose carrier included
- Additional attachments available
- Easy to maintain or repair on-site
- Self-energizing semi-metallic brake

Higher capacity for larger jobs

- 400 lb. capacity material hoist
- Single-handle design simplifies operation
- Extremely portable thanks to steel base on wheels
- Heavy-duty aluminum track sections
- Easy to set up
- No special tools required for assembly
- Sections bolt together
- One-person operation
- **28 ft. length standard, maximum 44 ft.**
- 4 ft. and 8 ft. extensions
- **Briggs & Stratton gas engine (Honda optional)**
- 100% ball bearing winch
- **Self-lubricating platform wheels**
- Solid steel carriage wheels with ball bearings
- Self-storing multi-purpose carrier included
- Additional attachments available
- Easy to maintain or repair on-site
- Self-energizing semi-metallic brake
